

The College is committed to providing a convenient, user-friendly tool. The latest version of the Morbidity Audit and Logbook Tool (MALT) includes enhancements which have been implemented based on user feedback, including:

[Additional search fields added to Journal/Supervisor Journal](#)

[“Type of Anaesthetic” field in the Case Details: Expanded Dataset is now a multi pick field](#)

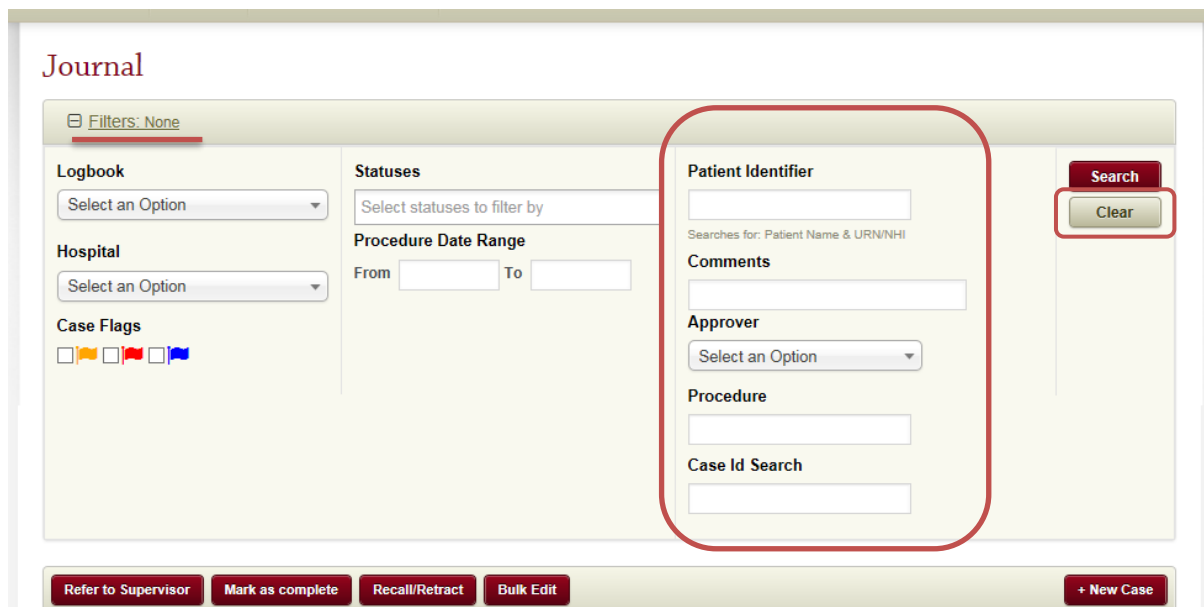

## Additional search fields added to Journal/Supervisor Journal replacing Keywords search

Additional search fields have been added to the Journal and Supervisor Journal screens:

- Patient identifier
- Comments
- Approver
- Procedure
- Case Id Search

This enhancement increases the speed of the search function.

**Note:** Search filters applied will display in the top left of the Journal/Supervisor Journal screens. The “Clear” button should be used to remove all previous search filters.

Refer to Supervisor Mark as complete Recall/Retract Bulk Edit + New Case

## "Type of Anaesthetic" field in the Case Details: Expanded Dataset is now a multi pick field

The "Type of Anaesthetic" field in the Case Details: Expanded Dataset section of the case entry screen is now a multi pick field. This allows users to record where multiple anaesthetics have been used.
