

MALT

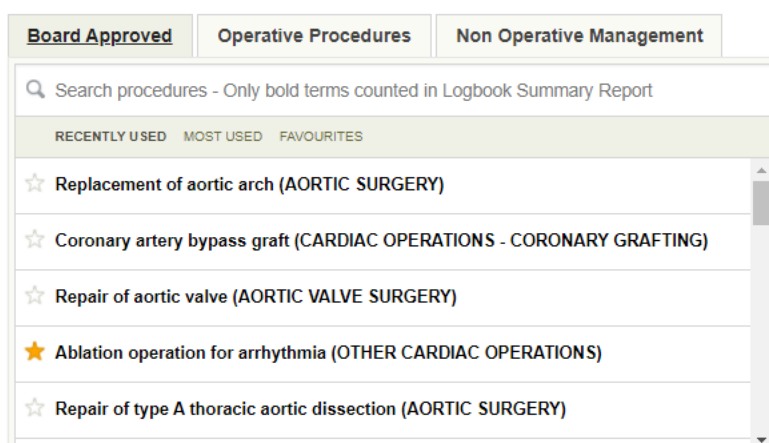

Your Morbidity Audit and Logbook Tool

Release notes for MALT version 1.9

The College is committed to providing a safe, convenient, and user-friendly tool for capturing data and generating reports. With this in mind, the following improvements to the system are available in version 1.9 of the Morbidity Audit and Logbook Tool (MALT).

New “Board Approved” tab on the case entry screen

A new tab labelled “Board Approved” has been added to the procedure search and selection section on the case entry screen for logbook types with Board Approved terms such as the SET, SIMG and Post Fellowship Training logbooks. The procedure reporting category has also been appended in brackets to the surgical term to assist in making the correct selection.

There are no changes to the Operative Procedures or the Non Operative Management tabs. On the Operative Procedures tab both Board and Non Board Approved procedures are still listed, with the Board approved procedures displayed in **bold**.

The Recently Used, Most Used and Favourite filters are available on all three tabs:

RECENTLY USED MOST USED FAVOURITES	
Procedure Filter	
Recently Used	System generated list of recently selected terms
Most Used	System generated list of terms most selected terms
Favourites	Member selects which procedures to tag as Favorites. ★ Arteriovenous anastomosis for renal dialysis

Signature line on Logbook Summary and Non-Board Terms reports

Training Boards may now elect to add Supervisor and Trainee signature lines to the Board Approved LSR and Non-Board Terms reports.

Three signature line options are available:

1. Supervisor only
2. Trainee only
3. Supervisor and Trainee

Option 1 – Supervisor signature only
