1. PURPOSE AND SCOPE

Fellows of RACS abide by a Code of Conduct. Trainees and International Medical Graduates (IMGs) on a pathway to Fellowship are also expected to conduct themselves with honesty and integrity and in accordance with the Code of Conduct. This policy defines the circumstances that may be regarded as misconduct by a Trainee, and how allegations of misconduct are managed.

Council of RACS has approved a set of principles that apply to all trainees in the SET program. Individual specialty training programs are responsible for formulating and publishing detailed training regulations for their program that comply with the principles of this policy and provide transparency of process to trainees. Individual specialties may add their own specific regulations but the principles of RACS policy stand.
