# **Second-line Assessment Form**

**Definitions:** An <u>area for consideration</u> is where the clinician believes areas of care COULD have been IMPROVED or DIFFERENT, but recognises that it may be an area of debate.

An <u>area of concern</u> is where the clinician believes that areas of care SHOULD have been better.

An <u>adverse event</u> is an unintended injury caused by medical management rather than by disease process, which is sufficiently serious to lead to prolonged hospitalisation or to temporary or permanent impairment or disability of the patient at the time of discharge, or which contributes to or causes death.

of this patient?	Yes No No		
(please describe	the <u>most</u> significant event)		
Area of: Consideration Concern Adverse event	Which:  Made no difference to outcome  May have contributed to death  Caused death of patient who would otherwise be expected to survive	Was the event preventable?  Definitely  Probably  Probably not  Definitely not	Associated with? Audited Surgical team Another Clinical team Hospital Other (please specify)
(please describe	the second most significant event	t)	
Area of: Consideration Concern Adverse event	Which:  Made no difference to outcome  May have contributed to death  Caused death of patient who would otherwise be expected to survive	Was the event preventable?  Definitely Probably Probably not Definitely not	Associated with? Audited Surgical team [ Another Clinical team [ Hospital [ Other (please specify) [

# **Guidelines for Second-line Assessment**

### Introduction

The Audit has two stages of peer-review assessment:

- 1) First-line Assessment (FLA)
- 2) Second-line Assessment (SLA)

### Stage 1: FLA

A FLA is conducted for all surgical cases.

### Stage 2: SLA

A SLA is conducted for select surgical cases needing further case note review.

### How to carry out a SLA:

- · Review the Surgical Case Form, medical records, and FLA comments
- Complete the SLA form
- Prepare a 1-2 page report (see enclosed example)

#### Structure your report with:

- > a succinct one-line title
- > a summary section
- > a comments section

#### Include in your report:

- > a short history and factual account of clinical events (note: do not include identifying information; names, dates, locations)
- > constructive comments on what could have been done differently
- > any Areas for Consideration, Areas of Concern, or Adverse Events
- > suggestions for changes in practice

#### Consider in your report:

- > Does the case adhere to a reasonable care pathway? And if not, how does it deviate and was it justifiable?
- Return ALL documents to the Audit office (see Checklist below)

### Checklist

Return by courier (phone the Audit office) the items below:

- 1) Surgical Case Form
- 2) Second-line Assessment Form
- 1-2 page report
- Medical records
- 5) ASM telephone number -
