Aim: A free event jointly presented by the Tasmanian Audit of Surgical Mortality, the Victorian Audit of Surgical Mortality, Tasmanian Department of Health, Safer Care Victoria and the Magistrates Court of Tasmania.

Mortality reviews are designed as investigative tools, educational sources and to highlight system and process errors in the management of patients identifying clinical events that led to the death of a patient.

CME/CPD: Approved by the Royal Australasian College of Surgeons. 1 point per hour, maximum 2 points in category 4.

Registrants: May include Fellows, IMGs, Medical students, Anaesthetists, nurses, researchers, clinical governance stakeholders, quality assurance associates and clinicians.

Registrations: Open until 8 July 2018, please register via:
