Image 4	File name:
	Caption:
Other information	

*Note: If multiple images are submitted, *Surgical News* may select the most appropriate image/s for publication.

For images to be of print quality, they should be provided as high res files (jpg or PNG format) – minimum 300DPI. DPI can be checked by right clicking on your image > properties > DPI count will be listed. A good guide is also anything approximately 1MB and above.

Please contact surgical.news@surgeons.org if you experience any issues with emailing your images (eg files are too large to email).
