#### FORM ROYAL AUSTRALASIAN COLLEGE OF SURGEONS

| Subject: | RACS Accreditation Application | Ref. No. | ETA-SET-045 |
|----------|--------------------------------|----------|-------------|
|----------|--------------------------------|----------|-------------|

#### **How to complete:**

The Royal Australasian College of Surgeons (RACS) Council has delegated the responsibility for the assessment of training posts to the Specialty Boards (see Appendix), using the approved Criteria for the Accreditation of Training Posts. Refer to the <u>Accreditation of Hospitals and Posts for Surgical Education and Training booklet</u> available on the RACS website for more information. Each criterion has its minimum requirements listed, and hospitals are requested to attach documentation that substantiates the achievement of this.

#### • Criteria requiring a single response

For some criteria, a single response will satisfy requirements irrespective of the number of specialties for which accreditation is sought.

An example of this is Standard 3, criterion 14: Supervised experience in Intensive Care Unit (ICU). The minimum requirement for this is evidence of accreditation by the Australasian College of Emergency Medicine. By attaching a copy of the accreditation certificate from the applicable body, this criterion is satisfied.

#### **RACS APPLICATION FOR ACCREDITATION FORM**

This document has been developed in consultation with RACS to facilitate the accreditation application process pending the availability of online applications for accreditation.

| IS THIS A NEW POST (NP) OR A | A RE-ACCREDITATION (R) |                          |  |

Document Owner: Manager, Surgical Training

#### **RACS ACCREDITATION CRITERIA**

Standard 1 – Building and maintaining a Culture of Respect for patients and staff.

A hospital involved in surgical training must demonstrate and promote a culture of respect for patients and staff that improves patient safety.

| Accreditation Criteria   | Factors Assessed  | Minimum Requirements  | Essential in the<br>Hospital / within<br>Hospital Network | List of documents attached that substantiate the achievement of minimum criteria |
|--|---|---|---|--|
| The hospital culture is of respect and   | Expressed standards about building respect and ensuring patient safety.   | Hospital provides a safe training environment<br>free of discrimination, bullying and sexual<br>harassment.   | In the hospital   |  |
| professionalism  |   | Hospital actively promotes respect, including teamwork principles.  | In the hospital   |  |
|  |   | Hospital has policies and procedures, including<br>training for all staff, which promotes a culture and<br>environment of respect.  | In the hospital   |  |
| 2. Partnering to<br>Promote Respect:<br>MoU or similar   | Hospital collaboration with RACS about complaints of unacceptable behaviours  | Hospital is committed to sharing with RACS relevant complaint information by or about RACS Fellows and Trainees.  | In the hospital   |  |
| statements/agreem<br>ents about the<br>need for 'Building<br>Respect,<br>Improving Patient<br>Safety | statements/agreem ents about the need for 'Building Respect, Improving Patient  (Fellows, Trainees and IMGs) that affect the quality of training. | Hospital actively reinforces positive standards<br>leading to improved behaviours and a respectful<br>environment. The hospital holds surgical teams<br>to account against these standards.   | In the hospital   |  |
| 3. Complaint Management Process  | Hospital has policies and procedures for the open and transparent   | Clearly defined and transparent policy detailing<br>how to make a complaint, options, investigation<br>process and possible outcomes.   | In the hospital   |  |
|  | management and investigation of complaints  | Clearly defined process to protect complainants.  | In the hospital   |  |
| ;<br>;   | of discrimination, bullying, and sexual harassment.  Summary data of complaints made, investigated and  | Hospital has documented performance review process for all staff, so it is aware of any repeated misdemeanors or serious complaints that need escalation/intervention requiring intervention to maintain a safe training environment. | In the hospital   |  |
|  | outcomes.   | Process in place to share with RACS summary<br>data, including outcomes or resolution of hospital<br>managed complaints alleging discrimination,<br>bullying and sexual harassment.   | In the hospital   |  |

## Standard 2 - Education facilities and systems required All trainees must have access to the appropriate educational facilities and systems required to undertake training

| Ad | ccreditation Criteria               | Factors Assessed                                   | Minimum Requirements   | Essential in the<br>Hospital / within<br>Hospital Network | List of documents attached that substantiate the achievement of minimum criteria |
|----|-------------------------------------|--|--|---|--|
| 4. | Computer facilities with IT support | Computer facilities and Internet/ broadband access | Computers and facilities available for information<br>management, online references and computer<br>searches | In the hospital   |  |
|    |                                     |  | Terminals at flexible sites which may include remote access  | In the hospital   |  |
|    |                                     |  | 24-hour computer access acknowledging security issues  | In the hospital   |  |
| 5. | Tutorial room available             | Documented booking and access processes            | Tutorial rooms available when required   | In the hospital   |  |
| 6. | Access to private study area        | Designated study area                              | Designated study area/room available isolated from busy clinical areas                                       | In the hospital   |  |
|    |                                     |  | 24-hour access acknowledging security issues   | In the hospital   |  |
| 7. | General<br>educational              | Weekly hospital educational program                | Weekly program publicised in advance   | In the hospital   |  |
|    | activities within the hospital      |  | Weekly Grand Rounds  | In the hospital   |  |
|    |                                     |  | Opportunities for trainees to present cases/topics   | In the hospital   |  |

# Standard 3 - Quality of education, training and learning Trainees will have opportunities to participate in a range of desirable activities, which include a focus on their educational requirements

|   | requirements  |   |   |   |  |  |  |
|---|---|---|---|---|--|--|--|
|   | Accreditation Criteria  | Factors Assessed  | Minimum Requirements  | Essential in the<br>Hospital / within<br>Hospital Network | List of documents attached that substantiate the achievement of minimum criteria |  |  |
| 8 | Coordinated     schedule of     learning     experiences for     each trainee | Publicised weekly timetable of activities which incorporate the learning needs of the trainee | <ul> <li>Weekly Imaging meeting</li> <li>One formal structured tutorial per week</li> </ul> | In the hospital In the hospital                           |  |  |  |
| Ç | Access to<br>simulated learning<br>environment                                | Documentation on local opportunities for self-directed skills acquisition and practice        | Simple basic skills training equipment available,<br>e.g. for suturing practice             | Within hospital network                                   |  |  |  |

| 10. Access to external educational activities for trainees     | Documented hospital HR Policy on educational leave for trainees  Documentation on educational equipment provided  | <ul> <li>Trainees given negotiated educational leave to attend mandatory face-to-face RACS/Specialty courses</li> <li>For other significant courses, modern educational approaches to distance learning, e.g. video-conferencing, available or being explored</li> <li>Evidence to confirm leave is provided</li> <li>Within hospital network</li> <li>Within hospital network</li> <li>Within hospital network</li> </ul> |
|--|---|--|
| 11. Opportunities for research, inquiry and scholarly activity | Recent or current research funding, publications, current research projects, recognised innovation in medicine, clinical care or medical administration | <ul> <li>Regular research meetings</li> <li>Trainees enabled to access medical records, once ethical approval (if necessary) for the project is obtained</li> <li>Shared responsibility by hospital, surgeons and RACS</li> <li>Within hospital network</li> <li>Within hospital network</li> <li>Within hospital network</li> </ul>   |
| 12. Supervised experience in patient resuscitation             | Documentation on opportunities for trainees to be involved in resuscitation of acutely ill patients   | Trainees rostered for clinical responsibilities in ICU or HDU and Emergency Department     Within hospital network   |
| 13. Supervised experience in an Emergency Department           | Documentation on accreditation of Emergency Department Documentation on role of trainees in the Emergency Department                                    | <ul> <li>Accreditation by Australasian College of Emergency Medicine</li> <li>Trainees manage patients in the Emergency Dept under supervision</li> <li>Within hospital network</li> <li>Within hospital network</li> </ul>  |
| 14. Supervised experience in Intensive Care Unit (ICU)         | Documentation on accreditation of ICU Documentation on role of trainees in ICU  | <ul> <li>Accreditation by ANZ College of Anaesthetists and the College of Intensive Care Medicine of Australia and New Zealand</li> <li>Trainees involved in patient care in ICU, under supervision</li> <li>Within hospital network</li> <li>Within hospital network</li> </ul>   |

Standard 4 – Surgical supervisors and staff
Program managed by appropriate and accessible supervisor supported by the institution and committed surgeons, delivering regular

| education, training and feedback  |   |   |   |  |  |  |
|---|---|---|---|--|--|--|
| Accreditation Criteria  | Factors Assessed  | Minimum Requirements  | Essential in the<br>Hospital / within<br>Hospital Network | List of documents attached that substantiate the achievement of minimum criteria |  |  |
| 15. Designated supervisor of surgical training                            | Documentation on supervisor   | <ul> <li>Clearly identifiable as supervisor</li> <li>FRACS in relevant specialty ± Member or Fellow of relevant specialty association or society</li> <li>Regularly available and accessible to trainees</li> </ul>   | In the hospital   |  |  |  |
| 16. Supervisor's role/<br>responsibilities                                | Hospital documentation on supervisor's role/responsibilities in keeping with College requirements as documented in the Surgical Supervisors Policy. | <ul> <li>Supervisor complies with RACS requirements as published on College website (responsibility for ensuring compliance shared by supervisor, hospital and RACS)</li> <li>Supervisor actively promotes surgical education principles</li> <li>Supervisor has completed mandatory training as</li> </ul> | In the hospital   |  |  |  |
|   | ,   | specified in the Surgical Supervisors Policy  | In the hospital   |  |  |  |
| 17. Credentialled specialist surgical staff willing to carry out surgical | Documentation on qualifications of specialist surgical staff  | Surgeons have FRACS (or are certified as equivalent) in that specialty and practise generally in the field and/or in related subspecialty areas   | In the hospital   |  |  |  |
| training  |   | Surgeons involved with training have completed<br>mandatory training as specified in the Surgical<br>Trainers Policy.   | In the hospital   |  |  |  |
| 18. Surgeons committed to   | Scheduled educational activities of surgeons  | Surgeons attend scheduled clinical, educational,<br>morbidity & mortality, and audit review meetings  | In the hospital   |  |  |  |
| training program  |   | All surgeons facilitate learning of the RACS nine core competencies http://www.surgeons.org/becoming-asurgeon/surgical-education-training/competencies/   | In the hospital   |  |  |  |
|   |   | responsibility for compliance shared by surgeons and hospital   | In the hospital   |  |  |  |

| 19. Regular supervision, workplace-based assessment and feedback to trainees         | Documentation on hospital/ department practices relating to supervision, workplace-based assessment and feedback to trainees   | • | Goals discussed and agreed between surgeon and trainee at the commencement of each surgical rotation  One-to-one clinical supervision  Frequent informal feedback encouraged  Structured constructive feedback and recorded assessment on performance every three months  Opportunities are provided for trainee to respond to feedback, especially with ongoing supervisor support  Workplace-based assessment tools should be utilized including mini-CEX, DOPS, case-based discussions, observed clinical activities including procedures, operations and clinical work such as ward rounds, clinical consultations, organizing operating lists, supervision of (more) junior doctors. | In the hospital |  |
|--|--|---|---|---|--|
| 20. Hospital recognition and support for surgeons involved in education and training | Documentation on weekly service and educational activities of surgical staff  Documentation on recognition and support for supervisors  HR Policy on educational leave  Secretarial services available for supervisor's role | • | The designated Supervisor of Training in each specialty is provided with paid, protected administrative time to undertake relevant duties appropriate to the specialty and in accordance with the SET Surgical Supervisors Policy. This should be related to the number of trainees but should be at least 0.2 EFT if there are 5 trainees under supervision.  Surgeons who attend mandated RACS and Specialty Society Supervisors' meetings / courses should have negotiated leave for these.  Accessible and adequate secretarial and IT services should be available for the supervisor's role related to training.  | In the hospital  In the hospital  In the hospital   |  |
| 21. Hospital response<br>to feedback<br>conveyed by<br>RACS on behalf of<br>trainees | Mechanisms for dealing with feedback   | • | Resolution of validated problems  | In the hospital   |  |

Standard 5 – Support services and flexibility for trainees

Hospitals and their networks are committed to the education, training, learning and wellbeing of trainees who acknowledge their

| professional resp                  | onsibilities  |  |   |  |
|------------------------------------|---|--|---|--|
| Accreditation Criteria             | Factors Assessed  | Minimum Requirements   | Essential in the<br>Hospital / within<br>Hospital Network | List of documents attached that substantiate the achievement of minimum criteria |
| 22. Hospital support for trainees  | Safe hours practised  Safety procedures for trainees leaving the hospital outside normal working hours Level and accessibility of | Rosters and work schedules in Australia take into account the principles outlined in the AMA National Code of Practice, Hours of Work, Shift Work, and Rostering for Hospital Doctors and in New Zealand the principles outlined in the Multi Employer Collective Agreement (MECA)  Hospital promotes trainee safety and provide | In the hospital  In the hospital                          |  |
|                                    | Human Resources services  Recognition of training needs of trainees by the  | <ul> <li>security when necessary</li> <li>Readily accessible Human Resources service<br/>available to trainees including counselling if<br/>required</li> </ul>  | In the hospital   |  |
|                                    | hospital and RACS<br>supervisor   | Allocation of clinical rotations take trainee's career/surgical specialty requirements and aspirations into account (joint hospital/supervisor responsibility)   | In the hospital   |  |
| 23. Trainees' professional         | Feedback from employers   | Trainees' recognition of the concept of Duty of Care   | In the hospital   |  |
| responsibilities –<br>Duty of Care |   | Trainee aware of RACS Code of Conduct  | In the hospital   |  |
| Duly of Galo                       |   | Joint trainee/supervisor and College responsibility  | In the hospital   |  |
| 24. Flexible Training Options are  | Commitment to enabling flexible employment for  | Hospital has a flexible employment policy allowing for part-time and job sharing options.  | In the hospital   |  |
| available for<br>Trainees          | RACS trainees while continuing in training.   | Clearly identified processes for applying for flexible employment.   | In the hospital   |  |
|                                    |   | Commitment to working with RACS to facilitate flexible employment for trainees.  | In the hospital   |  |
|                                    |   |  |   |  |

<sup>&</sup>lt;sup>1</sup> National Code of Practice – Hours of Work, Shiftwork and Rostering for Hospital Doctors. 1999. Australian Medical Association. Available at <a href="http://www.ama.com.au">http://www.ama.com.au</a>

Standard 6 - Clinical load and theatre sessions

Trainees must have access to a range and volume of clinical and operative experience which will enable them to acquire the

| competencies required to be a surgeon                                     |   |   |   |  |  |
|---|---|---|---|--|--|
| Accreditation Criteria  | Factors Assessed  | Minimum Requirements  | Essential in the<br>Hospital / within<br>Hospital Network | List of documents attached that substantiate the achievement of minimum criteria |  |
| 25. Supervised consultative ambulatory clinics                            | Documentation on frequency of consultative clinics  | Trainees attend a minimum of one consultative clinic per week   | In the hospital   |  |  |
|   | Documentation showing that trainees see new and follow-up patients  | Trainees see new and follow-up patients under supervision   | In the hospital   |  |  |
|   | Documentation on alternatives provided if no consultative clinics available in the hospital   | Trainees attend alternative supervised consultative clinics, which may be external to the hospital and network.   | Outside the hospital                                      |  |  |
| 26. Beds available for relevant specialty                                 | Documentation on accessible beds for specialty  | Sufficient beds to accommodate caseload required for training   | In the hospital   |  |  |
| 27. Consultant led ward rounds with educational as well as clinical goals | Documentation on the frequency of consultant led scheduled ward rounds  | <ul> <li>Two ward-rounds per week</li> <li>Facilitation of learning for trainees on each ward round (or soon afterwards, especially for feedback purposes).</li> </ul>  | In the hospital   |  |  |
| 28. Caseload and casemix  | Summary statistics of<br>number and casemix of<br>surgical cases managed<br>by the surgical department<br>/ specialty in the previous<br>year | Regular elective and acute admissions. This will vary depending on the type of service. (General guidelines will be provided six months before the accreditation cycle and more specific advice at least four weeks before the visit by the Accreditation Team) | In the hospital   |  |  |
|   | Number and casemix of<br>surgical cases managed<br>by each trainee's surgical<br>unit/team over the<br>previous year                          | Number of patients and casemix varies between<br>surgical units/teams. Supervisor focus is on<br>competence acquisition (same as preceding<br>point) by the trainee, across all the competency<br>domains.  | In the hospital   |  |  |

| 29. Operative experience for trainees                        | Documentation on weekly theatre schedule Evidence of trainees' exposure to emergency operative surgery | Minimum of three elective theatre sessions per week per specialist trainee (focus is on opportunities to gain required competencies and is based on a combination of theatre time, case numbers and casemix)  In the hospital |
|--|--|---|
|  | Evidence of specialist   | No conflicting service demands which interfere with required operative experience by trainee  |
|  | trainees' access to "index" cases from trainees' log book and feedback                                 | Number and level of surgical procedures varies with stage of training   |
|  | book and reedback  | Work schedules enable trainee to participate in emergency surgery  In the hospital  |
|  |  | Specialist trainees have access to those indexed cases required for their training  |
|  |  | Appropriate supervision is provided to trainees  In the hospital  |
| 30. Experience in perioperative care                         | Clinical examination rooms available  Timetable of postoperative                                       | Adequate rooms available to enable appropriate clinical examination of all preoperative patients: this could be at a pre-operative clinic or within day-of-surgery facility.  |
|  | ward rounds  | Scheduled daily postoperative ward rounds In the hospital   |
| 31. Involvement in acute/emergency care of surgical patients | Documentation showing frequency of involvement in acute/emergency care of surgical patients            | Weekly (minimum of 1 in 5 ) involvement in acute/emergency care of surgical patients  In the hospital   |

## Standard 7 - Equipment and clinical support services A hospital must have the facilities, equipment and clinical support services required to manage surgical cases in a particular specialty

| Accreditation Criteria   | Factors Assessed   | Minimum Requirements  | Essential in the                   | List of documents attached that substantiate the |
|--|--|---|------------------------------------|--|
|  |  |   | Hospital / within Hospital Network | achievement of minimum criteria                  |
| 32. Facilities and equipment available to carry out diagnostic and therapeutic surgical procedures | Hospital has the accredited status to undertake surgery                          | Evidence of accreditation by ACHS or NZCHS to undertake surgical care   | In the hospital                    |  |
| 33. Imaging –suitable diagnostic and intervention  | Documentation on accreditation   | Accredited by appropriate body/agency   | In the hospital                    |  |
| services   | Extent of services Timetable of weekly meetings with relevant surgical specialty | Regular meeting with surgeons and the relevant unit-team  | In the hospital                    |  |
| 34. Diagnostic laboratory services   | Documentation on accreditation   | Accredited by appropriate body e.g. NATA/<br>RCPA/ IANZ   | In the hospital                    |  |
|  | Extent of service  | Appropriate and timely pathology services available   | Within hospital network            |  |
|  | Timetable of weekly meetings   | Regular multidisciplinary meetings and unit/team pathology meeting – these meetings will necessarily mesh with the hospital clinical service              | Within hospital network            |  |
| 35. Theatre equipment  | Documentation on equipment available   | This will vary from a standard suturing set to very sophisticated theatre equipment depending on the specialty of the post, size and casemix of the unit. | In the hospital                    |  |
| 36. Support/ancillary services   | Documentation on services  | Physiotherapy, occupational therapy, speech<br>therapy and social work  | In the hospital or off site        |  |
|  |  | Rehabilitation services   | In the hospital or off site        |  |
|  |  | Specialty specific, e.g. breast care nurse/stoma<br>therapist/audiologist/prosthetics   | In the hospital or within network  |  |

Standard 8 - Clinical governance, quality and safety<sup>2</sup>
A hospital involved in surgical training must be fully accredited and have the governance structure to deliver and monitor safe

| surgical practices Accreditation Criteria  | Factors Assessed  | Minimum Requirements   | Essential in the                      | List of documents attached that substantiate the |
|--|---|--|---------------------------------------|--|
|  |   |  | Hospital / within<br>Hospital Network | achievement of minimum criteria                  |
| 37. Hospital accreditation status  | Evidence of accreditation   | Hospital accredited by ACHS or NZCHS   | In the hospital                       |  |
| 38. Risk management processes with patient safety and quality committee reporting to Quality Assurance Board | Documentation on processes including those for correct site surgery                 | Quality Assurance Committee or equivalent (with<br>senior external member) reporting to appropriate<br>governance body                 | In the hospital                       |  |
|  |   | Documentation published by hospital on HR,<br>clinical risk management and other safety<br>policies                                    | In the hospital                       |  |
| 39. Head of Surgical<br>Department and<br>governance role  | Documentation on structure of surgical department                                   | Designated head of department with defined role in governance and leadership   | In the hospital                       |  |
|  | Position description and reporting lines  |  |                                       |  |
| 40. Hospital Credentialing or Privileging Committee  | Documentation on<br>Credentialing or Privileging<br>Committee and its<br>activities | Clinicians credentialed at least every five (5) years  | Within hospital network               |  |
|  |   | <ul> <li>Credentialing relates to certification, subsequent<br/>training and experience and current scope-of-<br/>practice.</li> </ul> | In the hospital                       |  |
| 41. Morbidity & mortality and audit activities constituting peer review.                                     | Documentation on audit and peer review program for unit                             | Regular (at least monthly) unit/team review of<br>morbidity/mortality related to recent unit/team<br>activities.                       | In the hospital                       |  |
|  |   | All surgical staff and assigned medical students participate respectfully  | In the hospital                       |  |
|  |   | Opportunity for trainees to participate  | In the hospital                       |  |
| 42. Higher-level<br>Hospital systems<br>reviews  | Documentation on systems reviews  | Surgeons and trainees participate in review of systems as appropriate  | Within hospital network               |  |
|  |   | Could include targeted projects and/or root cause analysis   | Within hospital network               |  |
| 43. Experience available to trainees in root cause analysis  | Documentation on root cause analysis education                                      | Training and participation occurs in root cause analysis   | Within hospital network               |  |
