

# Royal Australasian College of Surgeons

## Activities Report

**For the period: 1 January – 31 December 2011**

The Activities Report is a document provided for the community, which details statistics on the College's activities in education, assessment and the surgical workforce. Education figures provided include details on Basic Surgical Trainees and Surgical Education and Training, examinations and placement. Activities of new, active and retired Fellows are also described.

**This, and other Activities Reports, are available at the website of the  
Royal Australasian College of Surgeons: [www.surgeons.org](http://www.surgeons.org)**

## FOREWORD TO ACTIVITIES REPORT

The Royal Australasian College of Surgeons is the unifying force for surgery in Australia and New Zealand. As a leading advocate for surgical health and well-being of patients, the College continues to stand for competence and quality in surgical care. As a College of Surgical Specialties, we work in partnership with 13 Specialist Societies and Associations to provide the framework for educating the surgeons of the future and delivering continuing professional development opportunities for the surgeons of today.

In support of this, the key activities of the College are to:

- Guarantee the continuing provision of high quality training;
- Serve the Fellowship, particularly by protecting and strengthening the culture that enables surgeons to act in the best interests of their patients;
- Promote health and well-being for the community; and
- Drive surgical excellence particularly by promoting and supporting surgical leadership in clinical governance, surgical audit and peer review.

The Activities Report provides detail of the surgical workforce and its distribution as well as information regarding surgical training and examinations. The report breaks down the data into useful cross tabs such as surgical specialties, geographic locations, age and gender demographics.

In 2011 we admitted 242 new Fellows to the College; this is the largest number of new Fellows admitted to the College since 2007. There was a 10% increase in the number of active female surgeons, including increases in specialties with fewer female surgeons than the College norm. In International Projects the College supported 22 surgeons from 10 countries through our International Scholarship program. Working with AusAID the College also completed almost 2000 operations/procedures in developing countries as part of our International Development Program.

The data provided in this report is true and accurate as at December 2011. The College continues to provide further reports through the year to ensure the most applicable data is broadly available.

I recommend this report to you.

Mr Ian Civil  
**President**

Royal Australasian College of Surgeons

# **Royal Australasian College of Surgeons End of Year Activities Report**

*For the period: 1 January – 31 December 2011*

## **INTRODUCTION**

The End of Year Activities Report outlines the developments and demographic data for the period 1 January to 31 December 2011. As with previous reports, the purpose is to provide a comprehensive review of the College's activities in the year 2011.

This report details activity in the following eight sections respectively:

- **SECTION ONE:** Activities of Skills Training
- **SECTION TWO:** Activities of International Medical Graduates
- **SECTION THREE:** Activities of Surgical Education and Training
- **SECTION FOUR:** Activities of Examinations
- **SECTION FIVE:** Workforce Distribution
- **SECTION SIX:** Activities of International Projects
- **SECTION SEVEN:** Activities of Conference and Events
- **SECTION EIGHT:** Activities of Victorian Skills and Education Centre

## **FORMAT**

Each section reviews the purpose of and key findings in the data. This is followed by the data in table and graphical format where possible. Where necessary, comments have been added to the tables to explain significant or idiosyncratic data. Each of the eight sections in this report and the data selected have been provided to facilitate a review of activities.

## KEY DEVELOPMENTS FOR 2011

In 2011 there were 6,666 Fellows of the Royal Australasian College of Surgeons, with 5,626 listed as active Fellows. This was a 4% increase in the number of active RACS Fellows compared to 2010. There was a steady growth of approximately 5% across the nine specialty areas last year, with the exception of the General Surgery (3.0%), Paediatric Surgery (2.5%) and Neurosurgery (1.7%).

### The Ageing Workforce

Just over half of the total number of active Fellows of the College was aged at least 50 years or older, with almost one in five active Fellows aged 65 years or older. Almost 15% of the active Australian Fellows indicated that they worked in a rural centre (according to RRMA classification); however of those 635 surgeons working in a rural centre over 40% were 65 years or older.

### Women in Surgery

There was a 10% increase in the number of active female surgeons admitted to the College last year, with a 20% increase in the number of active female Orthopaedic and Vascular surgeons. There was also a modest increase in the number of female Otolaryngology and Paediatric surgeons (13.6% and 12.5% respectively). Approximately 60% of active female surgeons were less than 45 years of age.

### Trainees

In 2011 we admitted 242 new Fellows to the College; this is the largest annual amount of new Fellows to join the College since 2007. Of these 73% were SET trainees and 27% were International Medical Graduates. Most SET trainees were aged 35 years or younger, although a greater proportion of paediatric and plastic surgery trainees were aged between 35 -39 years (33% and 37% respectively).

### International Projects

In International Projects the College supported 22 surgeons from 10 countries through our International Scholarship program. Working with AusAID the College also completed almost 2000 operations/procedures in developing countries as part of our International Development Program.

## GLOSSARY

n.a	Not Available
~	Not Applicable
ACT	Australian Capital Territory
ASSET	Australian and New Zealand Surgical Skills Education and Training
AMC	Australian Medical Council
AOA	Australian Orthopaedic Association
ASE	Academy of Surgical Educators
ATLASS	Australia Timor Leste Program of Assistance for Specialist Services
AUS	Australia
BSE	Basic Science Exam
CAR	Cardiothoracic Surgery
C&E	Conference and Events
CCrISP	Care of the Critically Ill Surgical Patient
CLE	Clinical Epidemiology
CLEAR	Critical Literature Evaluation and Research
CPD	Continuing Professional Development
COAG	Council of Australian Governments
EMST	Early Management of Severe Trauma
ESC	English-Speaking Country
GEN	General Surgery
HECS	Health Education and Clinical Services
IDP	International Development Program
IMG	International Medical Graduate
Inc.	Including
INTP	International Projects
M1	Capital City
M2	Other Metropolitan
MCNZ	Medical Council of New Zealand
MCQ	Multiple Choice Questionnaire
MOPS	Maintenance of Professional Standards
NEU	Neurosurgery
NSA	Neurological Society of Australasia
NSW	New South Wales
NT	Northern Territory
NZ	New Zealand
NZOA	New Zealand Orthopaedic Association
OB & GYN	Obstetrics and Gynaecology
OMX	Oral and Maxillofacial Surgery
OPH	Ophthalmology

ORT	Orthopaedic Surgery
O/S	Overseas
OSCE	Objective Structured Clinical Examinations
OTO	Otolaryngology - Head and Neck Surgery
OTV	Overseas Training Visa
OTVP	Occupational Training Visa Program
PAE	Paediatric Surgery
PHY	Physician
PIP	Pacific Islands Projects
PLA	Plastic and Reconstructive Surgery
PSA	Provincial Surgeons of Australia
QLD	Queensland
RACGP	Royal Australian College of General Practitioners
RACS	Royal Australasian College of Surgeons
RANZCO	Royal Australian and New Zealand College of Ophthalmologists
RANZCOG	Royal Australian and New Zealand College of Obstetricians and Gynaecologists
RRMA	Rural, Remote and Metropolitan Areas
SA	South Australia
SAT SET	Supervisor and Trainer Courses
SET	Surgical Education Trainee
SET1	Surgical Education Trainee Year 1 of Training
SET2+	Surgical Education Trainee Year 2 or more of Training
SSE	Surgical Science Examination
ST	Skills Training
STST	Short Term Specified Training
TAS	Tasmania
URO	Urology Surgery
VAS	Vascular Surgery
VIC	Victoria
VSEC	Victorian Skills and Education Centre
WA	Western Australia
WFD	Workforce Distribution

## **SECTION ONE: ACTIVITIES OF SKILLS TRAINING**

### **EXPLANATORY NOTES**

The Skills Training Department provides courses, some of which are a mandatory component of surgical training. Doctors from other medical disciplines are also involved as both faculty and participants.

Four courses, the Australian and New Zealand Surgical Skills Education and Training (ASSET), Care of the Critically Ill Surgical Patient (CCrISP), Critical Literature Evaluation and Research (CLEAR) and Early Management of Severe Trauma (EMST) are mandatory for most surgical education and training (SET) trainees. The Skills Training department also offers the newly developed Training in Professional Skills (TIPS) course to trainees.

Participants are provided with close mentoring and appraisal of performance throughout the courses and beyond through feedback to their surgical supervisors when required.

#### **ASSET**

The ASSET course aims to provide an educational package of generic surgical skills with an emphasis on small group teaching, intensive hands-on practice of basic skills, individual tuition, personal feedback to participants and the performance of practical procedures.

The following four modules are undertaken over two and a half days of the course:

- Basic Surgical Skills I (instruments, knots and incisions)
- Basic Surgical Skills 2 (dissection and suturing)
- Musculoskeletal
- Minimal Access Surgery

Although this course is not formally assessed, attendees are required to attend and interact in all components in order to successfully complete it.

#### **CCrISP**

CCrISP focuses on doctors developing simple, useful skills for managing critically ill patients and promotes the coordination of multidisciplinary care where appropriate. The CCrISP course encourages doctors to adopt a system of assessment to avoid errors and omissions, and uses relevant clinical scenarios to reinforce the objectives. The course stresses the importance of the individual doctor accepting responsibility for the coordination and management of patient care.

The following principles are reinforced throughout the course:

- Accept responsibility for patient management
- Adopt a systematic approach to patient assessment
- Appreciate that complications tend to cascade rapidly
- Anticipate and prevent complications with simple, timely actions
- Apply effective communication skills to facilitate patient care
- Ask for appropriate assistance in a timely manner

The participant is assessed by their contribution to the various sections throughout the course, as well as their performance in a 45-minute simulated patient scenario.

### **EMST**

EMST focuses on the management of injury victims in the first one to two hours post-accident, with emphasis on life-saving skills and systematic clinical approach. After completing the EMST course, participants will be able to:

- Demonstrate concepts and principles of primary and secondary patient assessment
- Establish management priorities in a trauma situation
- Initiate primary and secondary management of unstable patients
- Demonstrate skills used in initial assessment and management

This course is assessed by contribution to the various sections, a 40-question multiple choice questionnaire paper, and a 15-minute simulated patient scenario.

### **CLEAR**

CLEAR is designed to provide tools to undertake critical appraisal of surgical literature and to assist surgeons in the conduct of clinical trials, aiming to make the language and methodology relevant to surgeons and the day-to-day activities in their practice.

The curriculum includes:

- Guide to clinical epidemiology
- Framing clinical questions
- Randomised controlled trial
- Evidence-based surgery
- Non-randomised and uncontrolled studies
- Diagnostic and screening tests
- Statistical significance
- Searching the medical literature
- Decision analysis
- Cost-effectiveness studies

There is no formal assessment for this course; participants are required to attend and interact in all components in order to achieve certification.

### **Statistics for Surgeons**

The aim of this course is to increase the conceptual understanding and practical skills in medical statistics as it is commonly applied to surgical clinical research. Topics covered include elementary and descriptive statistics such as the comparison of groups and small contingency tables, as well as specific intermediary topics such as logistic regression, survival analysis, meta-analysis, and the design of relational databases. At the end of the course participants are able to identify and manipulate common types of data, express and graph summaries of data, and will have performed a selection of statistical tests and been exposed to the interpretation and expression of the results. This course is not assessed, however participants are required to attend and interact in all components of the course in order to achieve certification.

This course will not be offered in 2012.

### **Training in Professional Skills**

The TIPS course is a new skills course delivered by RACS, with the first course launched in Sydney in July 2011. TIPS is designed to be generic to all specialties of surgical training and be relevant to Trainees who have already undertaken 2 to 3 years of their surgical training.

The course focuses on patient-centred communication and team-oriented non-technical skills in surgery. Through simulation, participants address issues and events that occur in the clinical and operating theatre environment that require skills in communication, teamwork, crisis resource management and leadership.

### **Skills Faculty**

Skills courses are supported by a volunteer workforce of 1142 instructors represented across all disciplines of medicine and surgery, with 117 (10%) teaching on more than one program. Fellows make up 65% of skills course faculty, with the remaining faculty made up of emergency physicians (14%), anaesthetists (8%), intensivists (5%), general practitioners (4%), SET trainees (3%) and International Medical Graduates (1%).

## SECTION TWO: ACTIVITIES OF INTERNATIONAL MEDICAL GRADUATES

### EXPLANATORY NOTES

#### Australia

The processes for assessing the suitability of International Medical Graduates (IMG) for practice as surgeons in Australia are in accordance with the principles outlined in the following publications:

- RACS – Specialist Assessment of International Medical Graduates in Australia policy  
<http://www.surgeons.org/AM/Template.cfm?Section=Policies3&CONTENTID=29617&TEMPLATE=/CM/ContentDisplay.cfm>
- AMC / Committee of Presidents of Medical Colleges / State and Territory Medical Boards / State and Territory Health Departments “Assessment process for Area of Need specialists: User’s guide”  
<http://www.amc.org.au/images/publications/AONUsersGuide.pdf>
- AMC / COAG – Guidelines on the Specialist Assessment Pathways  
<http://www.amc.org.au/images/FormsSpecialistCandidate/Att17.pdf>

#### **International Medical Graduates – Period of Clinical Assessment**

The process related to the period of clinical assessment for IMGs is outlined in the Clinical Assessment of International Medical Graduates in Australia policy. This is available at:

<http://www.surgeons.org/AM/Template.cfm?Section=Policies&template=/TaggedPage/TaggedPageDisplay.cfm&TPLID=29&OriginalID=1&InterestCategoryID=103&ExpList=1,147&ICTitle=International%20Medical%20Graduates>

#### **Short-Term Specified Training Program**

Short-term training programs in Australia allow IMGs the opportunity to undertake a short-term specified training (STST) program not available in their country of training with the objective of improving their professional skills and experience. Within the surgical specialty, an IMG approved to undertake an STST position/program can develop surgical skills and experience through a work based surgical program provided by the hospital. This program replaced the old Occupational Training Program (OTV) in June 2009.

## New Zealand

In New Zealand, the College acts as an agent of, and provides recommendations to, the Medical Council of New Zealand (MCNZ). The provision of preliminary advice, interviews and reviews occurs only in response to requests from the MCNZ.

The MCNZ has statutory responsibility for the standard set for registration and requests that the College advise whether an IMG's training, qualifications and experience are comparable to, or as good as, those of locally trained doctors registered in the same vocational branch of surgery.

A recommendation on the IMG's suitability for the vocational registration pathway, and whether they should be under MCNZ approved supervision while they adjust to working in the New Zealand health environment or under College approved assessment to ensure the IMG is at the required standard, is provided to the MCNZ. The MCNZ considers these recommendations and determines the type of medical registration that will be offered to the IMG and any restrictions or conditions that may be placed on that registration. The MCNZ advises the College and the IMG of its decision. If the IMG is required to undertake a College approved vocational assessment, the College is asked to approve the post and the supervisor(s) and the supervisor's reports are sent to the College and to the MCNZ. Once all assessment requirements have been completed by the IMG, the College recommends to the MCNZ whether the IMG should be approved for inclusion on the vocational register in the relevant specialty, or not.

Admission to Fellowship of the Royal Australasian College of Surgeons is a decision of the College and this decision is not part of the vocational registration assessments for the MCNZ. IMGs who have obtained vocational registration in New Zealand may apply to the College for admission to Fellowship, and the information from the vocational registration process may be considered by the College in reaching its decision on that application.

## SECTION THREE: ACTIVITIES OF SURGICAL EDUCATION AND TRAINING

The College is accredited to conduct surgical training in nine specialties. The following specialties conduct bi-national training programs:

- Cardiothoracic Surgery
- Neurosurgery
- Paediatric Surgery
- Urology Surgery; and
- Vascular Surgery

Separate programs are conducted in Australia and New Zealand for the following specialties:

- General Surgery
- Orthopaedic Surgery
- Otolaryngology – Head and Neck Surgery; and
- Plastic and Reconstructive Surgery

General Surgery and Orthopaedic Surgery remain the largest training specialties within the College.

Surgery remains an attractive career path for doctors, as shown by the large field of applicants for the training programs in the nine specialties. The number of appointments made in any year is dependent on the number of trainees finishing the program and the consequent number of vacant accredited posts. The College does not control the number of posts available but accredits posts nominated by jurisdictions.

## SECTION FOUR: ACTIVITIES OF EXAMINATIONS

### EXPLANATORY NOTES

#### Examinations Activities

Location - State and/or Country reflected in these reports refer to the candidate's mailing address. This is not necessarily the State where the candidate has undertaken all of their training or oversight.

#### Fellowship Examinations

Numbers reflected in the Fellowship Examination reports are representative of the exams held in Australia and New Zealand in May and September 2011 and has been reported with respect to:

- Individual Sitting and Annual Pass Rate
- Eventual Pass Rate by Specialty (compares the number of Trainees successfully completing the Fellowship Examination within a 5 year period since first attempt including IMGs)
- Annual Fellowship Examination Pass Rate by State and Specialty – International Medical Graduates
- Annual Fellowship Examination Pass Rate by State and Specialty – Trainees
- Cumulative to Date Attempts to pass the Fellowship Examination (all candidates presenting in 2011 and the number of attempts)

#### SET Examinations

##### Surgical Science Examination

The Surgical Science Examination (SSE) comprises two generic papers and one specialty specific paper for Cardiothoracic Surgery, General Surgery, Neurosurgery, Otolaryngology - Head and Neck Surgery, Urology Surgery and Vascular Surgery. Numbers reflected in these reports are representative of examinations held in Australia and New Zealand in February and June 2011 (including all attempts). Specialty specific examinations remain in their current format for Orthopaedic Surgery (held in Australia and New Zealand in March and October 2011), Paediatric Surgery (held in Australia and New Zealand in June, September and October 2011) and Plastic and Reconstructive Surgery (held in Australia and New Zealand in October 2011) and results are also included in these reports.

##### Clinical Examination

The Clinical Examination consists of 16 Objective Structured Clinical Examinations (OSCE) stations. Numbers reflected in the Clinical Examination report are representative of the exams held in Australia and New Zealand in February and June 2011 (including all attempts).

## SECTION FIVE: WORKFORCE DISTRIBUTION

### EXPLANATORY NOTES

#### **Recertification**

The College Council requires all Fellows involved in any form of medicine, surgery, medico-legal services and non-clinical work to participate in either the College Continuing Professional Development (CPD) Program or in another CPD program approved by the College as meeting its standards for CPD. This triennial program aims to advance the individual surgeon's surgical knowledge and skills for the benefit of patients and to provide tangible evidence of participation and compliance with the CPD Program by the award of the Certificate of Continuing Professional Development. Recertification demonstrates maintenance of surgical standards by individual surgeons in Australia and New Zealand.

#### **Professional Development**

To facilitate the maintenance of surgical competence of Fellows, the College provides professional development activities that are tailored to the specific needs of Fellows. These activities address the skills and knowledge required in each of the College's nine surgical competencies. The number of courses offered increased by 34% from 2007 to 2008 and by 15% from 2008 to 2009. However, from 2009 to 2010 the number decreased by 14% due to limited external funding received to offer additional workshops for surgeons.

#### **External Funding to Support the Surgical Workforce**

The College has sought and received external funding from different sources over many years to develop projects aimed at addressing surgical workforce shortages in rural and regional areas. In 2010, we have received funding from the Australian Federal Government and the Queensland State Government to support surgeons and Trainees in rural areas. These projects help international medical graduates, mentor, coach and up-skill those considering rural surgical practice and assist rural surgical practitioners to maintain their skills.

#### **Library and Website services**

Fellows and Trainees have free access to an extensive range of online journals, texts and databases. This is supplemented by a literature search and journal acquisition service. The College also maintains a comprehensive website, which includes information about the services and resources available to support surgeons.

## SECTION FIVE: WORKFORCE DISTRIBUTION

In all tables the last known address is used when the current address is unknown. Regionality is based on mailing postcode and country. An active Fellow is involved in medicine, surgery, medico-legal work or other specialist non-procedural and non-clinical work such as surgical administration and academia.

## SECTION FIVE: WORKFORCE DISTRIBUTION

All active Fellows have a requirement to participate in either the College CPD program or in another CPD program approved by the College as meeting its standards for CPD. In 2010 there were 4975 Fellows participating in the College CPD or other CPD approved program.

### ITEM: WFD.17 – Participation in RACS and other CPD Programs 2010

College CPD Programs	Number of Fellows participating	%
Royal Australasian College of Surgeons	3827	76.9%
Australian Orthopaedic Association	638	12.8%
New Zealand Orthopaedic Association	224	4.5%
Royal Australian College of General Practitioners	17	0.3%
Royal Australian and New Zealand College of Ophthalmologists	263	5.3%

## SECTION SIX: ACTIVITIES OF INTERNATIONAL PROJECTS

The RACS International Development Program (IDP) is involved in a range of initiatives to deliver essential health services and develop surgical and specialist capacity in Asia and the Pacific.

Since 1994, the College has worked with the Australian Government's overseas aid program, AusAID, to deliver specialist surgical services and training to East Timor, Papua New Guinea and the Pacific Islands. These projects seek to address the tertiary health challenges faced by developing countries in the region through the deployment of specialist surgical teams, the training of local medical personnel and the procurement of biomedical equipment.

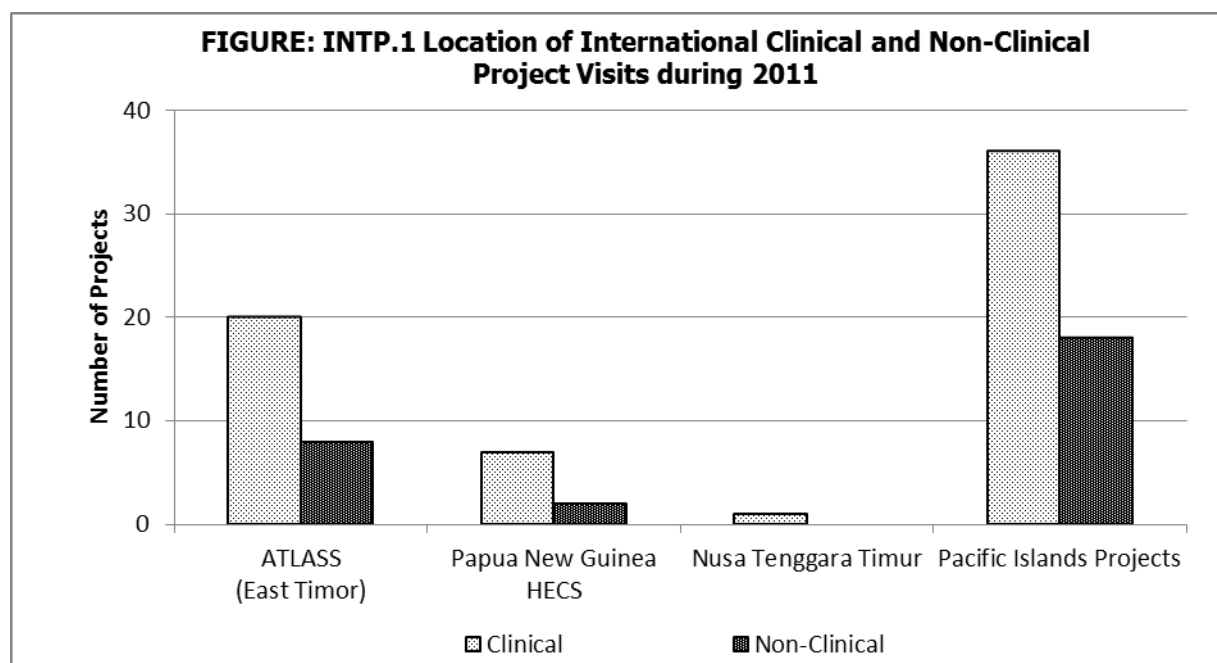

The Program supports a number of international development projects in the health sector including Project China, Myanmar Primary Trauma Care Project and the East Timor Eye Program. College Fellows working with local partners also provide a range of support services to Nusa Tenggara Timur, developing local medical capacity and skills through service delivery, practical training and skills transfer.

The IDP also provides scholarships for doctors and other health professionals from developing countries in Asia and the Pacific. These scholarships fund training opportunities and facilitate professional contact with Australasian medical institutions and colleagues.

## SECTION SIX: ACTIVITIES OF INTERNATIONAL PROJECTS

### ITEM: INTP.1 – International Projects Clinical and Non-Clinical Visits 2011

## SECTION SEVEN: ACTIVITIES OF CONFERENCE AND EVENTS

The Conferences and Events department is located in the division of External Affairs within the College of Surgeons.

The Department manages surgical events on behalf of Fellows and medical professionals with a major annual event being the College Annual Scientific Congress. The Annual Scientific Congress (ASC) was held in Adelaide, Australia in 2011.

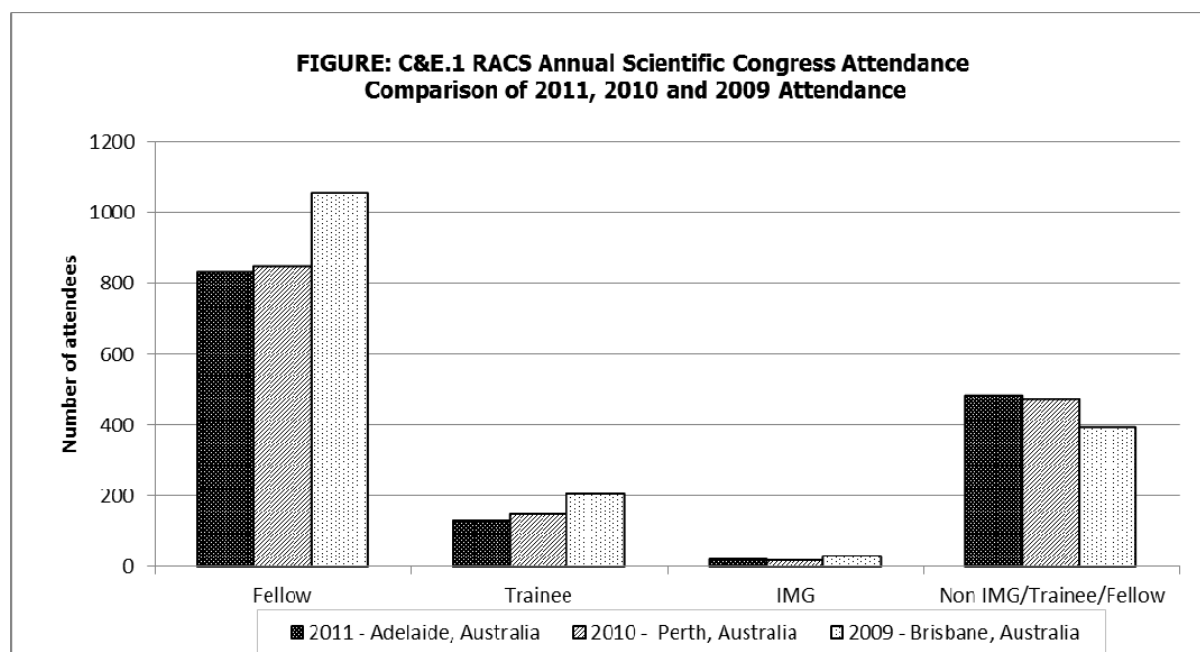

The Department strives to deliver conferences of high professional value, with strong perceptions of educative worth demonstrated through the positive feedback of College Fellows.

The Department tenders for several external events each year and is frequently successful as the Department has the interests of Fellows at the forefront of its event management model.

## **SECTION EIGHT: ACTIVITIES OF VICTORIAN SKILLS AND EDUCATION CENTRE**

The Victorian Skills & Education Centre's major function is to ensure that surgeons and other health professionals have access to the facilities and technical support required for training in modern surgical skills and related areas.

The Centre provides a well-equipped and flexible skills training laboratory and multi-purpose training and conference areas in which regular surgical training courses are conducted for Trainees and Fellows of the College. Other health professionals, specialist training groups, paramedical staff and medical students are encouraged to utilise the Centre for teaching and practice of skills. The training and meeting rooms are available for use by College staff and outside organisations for their training and conference requirements.

### **Skills Laboratory Courses**

The table shows the number of workshops and participants in the Skills Laboratory. Workshops are separated into two categories. College workshops are those for College Fellows and Trainees including mandatory courses such as ASSET, specialty training programs, and optional skills courses. External events include workshops conducted on behalf of other medical specialty Colleges and a range of other groups.

In 2011 there were 73 events in the Skills Laboratory over 93 days. The Laboratory was engaged over an additional 77 days with preparation, clean-up and maintenance associated with these events.

### **Training Areas**

In 2011 there were a total of 1550 individual bookings in the Centre's training areas including the Skills Laboratory. This includes 929 bookings for College training and staff activities, 120 for tenants and affiliated organisations, and 501 for paying external customers. The cumulative total of people attending these activities was 33,857.

The table shows data for events conducted in both the Centre's conference areas and Skills Laboratory. The number of College courses and surgical training-related meetings held in the conference areas in each month is shown, excluding staff meetings, board meetings, interviews, etc.

## APPENDIX A: DEFINITIONS FOR REGIONAL, RURAL AND RRMA DATA

### Regional and Rural Data

The following are explanatory notes on how region and RRMA codes are determined.

#### RRMA Codes

The RRMA code is the 'Rural, Remote & Metropolitan Area' code. It is used to help classify healthcare facilities across Australia according to the types of communities they serve. The RRMA system divides Australia into areas according to city status, population, rurality and remoteness.

#### Use of Postcode to Determine Region

The allocation of Fellows to regions and Rural, Remote & Metropolitan Areas (RRMA) classifications is determined by the postcode from each Fellow's preferred mailing address as of December 2011. The last known mailing address was used if the current address was unknown.

#### Rural Remote and Metropolitan Areas – (RRMA) Classification & Population Size

RRMA CODE	DETAILS	POPULATION
<b>M1</b>	<b>Capital cities/large metropolitan areas</b> (Sydney, Melbourne, Brisbane, Perth, Adelaide, Hobart, Darwin and Canberra)	> 500,000
<b>M2</b>	<b>Other metropolitan</b> (Newcastle, Wollongong, Queanbeyan (part of Canberra-Queanbeyan), Geelong, Gold Coast-Tweed Heads, Townsville-Thuringowa)	> 100,000
<b>R1</b>	<b>Large rural cities</b> (Albury-Wodonga, Dubbo, Lismore, Orange, Port Macquarie, Tamworth, Wagga Wagga, (NSW); Ballarat, Bendigo, Shepparton-Mooroopna (VIC); Bundaberg, Cairns, Mackay, Maroochydore-Mooloolaba, Rockhampton, Toowoomba (QLD), Whyalla (SA); and Launceston (TAS))	25,000 – 99,999
<b>R2</b>	<b>Small rural centres</b> (e.g. Armidale, Mildura, Hervey Bay, Mount Gambier, Bunbury, Devonport)	10,000 – 24,999
<b>R3</b>	<b>Other rural centres</b> (e.g. Cowra Shire, Temora Shire, Guyra Shire (NSW); Ararat Shire, Cobram Shire (Vic); Cardwell Shire, Whitsunday Shire (Qld); Barossa, Pinnaroo (SA); Moora Shire, York Shire (WA); George Town, Ross (TAS); Coomalie, Litchfield (NT))	< 10,000
<b>Rem 1</b>	<b>Remote centres</b> (e.g. Broome, Kalgoorlie/Boulder, Alice Springs)	25,000 – 99,999
<b>Rem 2</b>	<b>Other remote centres</b> (e.g. Bourke, Orbost, Quilpie, Coober Pedy, Shark Bay, King Island, Gove)	10,000 – 24,999

Source: Rural, Remote and Metropolitan Area (RRMA) classification developed by the Commonwealth Departments of Primary Industries and Energy and Health and Family Services (DPIE & DHFS 1994).
